-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 February 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Claims 3 and 17 are objected to because of the following informalities: Claim 3 should depend from claim 2 to provide antecedent basis for "the removable component". In claim 17, lines 10, and 12, all occurrences of "latch" should read -latch assembly-- for consistency. Appropriate correction is required.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 4, 5 and 8-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Lee et al (378).

Lee et al teaches an apparatus including a housing 100, an access door 20 in the figs. 3 and 4 embodiment having a receptacle 206 to receive a retaining element end of a latch 224, which latch allows or prevents movement of the access door, a slot 11 in the

Art Unit: 3676

housing as seen in fig. 1 to receive a locking head 42 of a lock which is movable between first and second orientations, a handle 220 guided by a guide element slot of the housing as seen in fig. 1, a stop element of the latch which is defined by the rectangular portion of the latch of figure 3 which has the slot 226 therein, which stop element engages the lock head 42. With respect to the limitation in the last three lines of claims 1 and 4, the lock head 42 may be retracted out of the slot 226 in the latch and still be within the periphery of the slot 11 in the housing 100 such that the access door may be opened when the lock head 42 is in its first orientation.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lee et al (378) in view of Hotsumi.

Hotsumi teaches a spring 70 to bias a latch 68 into its door engaging position. It would have been obvious to one of ordinary skill in the art at the time the invention was made to utilize a spring with the latch of Lee et al, in view of the teaching of Hotsumi, the motivation being that the latch would automatically extend into its door engaging position as is conventional with latch bolts, to simplify locking of the door.

Claims 2, 3 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3676

Claims 11-21 are allowed.

Applicant's arguments with respect to claims 1, 4, 5 and 7-10 have been considered but are moot in view of the new ground(s) of rejection.
